CAT Team – Real-Time Intelligence

WHAT IS REAL- TIME DASHBOARD

REAL-TIME DASHBOARD

Your number one choice when working with visualization of time-based data and the need for short time to insight

005

With the engine built by Microsoft, you get **extremely fast query times** and thus short time to insight at the needed time

004

A subset of visualizations given by the **KQL query language** gives you almost all you need in visual representation

003

Can ingest, store and manipulate huge amounts of data with **no degradation** in performance or experience

001

Built from the ground up to support high granularity, **event** and **time-based data** with a powerful query engine used all around the Azure space

002

Built to contain all your needed operational data to **calculate, manipulate** and output the needed hidden insights in data

DEMO

POWER BI AND REAL-TIME DASHBOARD

The two tools are complimenting each other and have different purposes

NON-EXHAUSTIVE

FILTERING

COST

VISUALIZATION

DATA ACCESS

SHARING

REAL-TIME
DASHBOARD

DYNAMIC TIME
RANGE
FILTERING

THE
EVENTHOUSE
COST IS THE
ONLY CU USAGE

LIMITED
GALLERY. CAN
USE PLOTLY FOR
CUSTOM VIZ

ONLY KQL DATA
AND IN "DIRECT
QUERY"

SHARING
REQUIRES
ACCESS TO THE
KQL DATA

POWER BI
REPORT

EASY FILTER ON
EVERYTHING

PBI USES
CAPACITY
UNITS. THE
SOURCE DATA
ALSO USES CU'S

RICH GALLERY
WITH EXTENSIVE
CUSTOMIZATION
CAPABILITIES

IMPORT, DIRECT
QUERY, DIRECT
LAKE

EASY SHARING
BOTH INTERNAL
AND EXTERNAL
